Introduction of Chengdu——Home to Giant Pandas

Chengdu is one of the most important economic, financial, commercial, cultural, transportation, and communication centers in Western China. Chengdu Shuangliu International Airport is one of the 30 busiest airports in the world. Chengdu also hosts many international companies and more than 12 consulates. More than 260 Fortune 500

companies have established branches in Chengdu due to huge demand of Western China. In 2006, it was named China's 4th-most liveable city by China Daily.

The fertile Chengdu Plain, on which Chengdu is located, is also known as the "Country of Heaven" (Chinese: 天府之国; pinyin: Tiānfǔzhiguó), a phrase also often translated as "The Land of Abundance". The discovery of the Jinsha site suggests the area of Chengdu had become the center of the bronze age Sanxingdui culture around the time of the establishment of the state of Shu, prior to its annexation by Qin in 316 BC.

Introduction of University of Electronic Science and Technology of China(UESTC)

Renowned as China's cradle for the national electronic industry, University of Electronic Science and Technology of China (formerly Chengdu Institute of Radio Engineering) is situated at Chengdu, the city of over a thousand-year-old cultural history in "the land of abundance". As one of the seven earliest key universities in national defense, UESTC became one of the nation's key universities in 1960. Then, in 1997 it was included as one of the first universities into "Project 211", a project in China for developing 100 first-class universities and a number of key fields of research for the 21st century. In 2001, UESTC was admitted into the nation's Project 985, receiving special support for developing world-class universities and world-famous research-oriented universities.

Fifty-nine years' efforts and cultivations have witnessed the University's process from sole dependence on electronic information engineering to all-around programs in electronic disciplines, and the University now turns out to be a key multidisciplinary university with electronic science and technology as its nucleus, engineering as its major field and featured the harmonious integration of science, engineering, management and liberal arts, well prepared at the call of the history to come up as a high-level research-oriented university.
